scholars have analyzed the holy quran for centuries adopting practices and guidelines drawn from its wisdom their studies however focus on the literal meaning of its verses in this ground breaking work sahal a mohamed uses a numerological approach to interpret the hidden meanings in the holy book he begins with a simple question if the quran is truly the word of allah can this be shown mathematically through simple equations his study uncovers correlations and patterns that prove the holy text is beyond the ability of any human and is indeed the work of the almighty from the central tenets of the islamic faith to the complexities of the human body these numerical correlations show that the holy quran reflects allah s mastery not only in its content but in the very structure of the book itself its secrets are astounding in their elegance and will help to unlock a greater understanding of our life on earth and the foundations of space and time
